EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is that the prior art fails to teach or reasonably suggest providing a calibration test target, aiming the center of the target at an optic axis of a lens of a camera, and searching a pinpoint along the optic axis to enable at least one image height on an image plane which is related to the geometric figure and the corresponding zenithal angle between the incident rays of light and the optic axis both fit in with a projection model.

As for claim 12, the primary reason for allowance is that the prior art fails to teach or reasonably suggest providing a calibration test target, placing target in the field of view of a camera, changing the position of the test pattern, connecting both the centers of the target and the image to locate an optic axis, and searching a pinpoint along the optic axis to enable at least one image height on an image plane which is related to the geometric figure and the corresponding zenithal angle between the incident rays of light and the optic axis both fit in with a projection model.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
